

BD Visitec Single-Use Microsurgical Instruments

COMPANY	BD Medical Ophthalmic Systems
PHONE	+44 1865 781607
WEB	www.bd.com/ophthalmology
KEY FEATURES	
<ul style="list-style-type: none"> • Made of stainless steel • Reduces the risk of infection • Helps health care facilities adhere to safety requirements and recommendations 	

BD Medical Ophthalmic Systems (Oxford, United Kingdom) launched an expanded line of BD Visitec single-use instruments and customized trays at the European Society of Cataract and Refractive Surgeons (ESCRS) annual meeting in Barcelona, Spain. According to company literature, 30 new stainless steel instruments are designed to increase efficiency in the operating room and eliminate the need for costly, time-consuming resterilization. Single-use knives, instruments, and cannulas come prepackaged in a sterile, ready-to-use tray.

ProTekt 2.4-mm Slit Knife

COMPANY	Diamatrix Ltd.
PHONE	+1 800 867 8081
WEB	www.diamatrix.com
KEY FEATURES	
<ul style="list-style-type: none"> • Creates 2.2- to 2.4-mm incisions • Designed with sharps safety features • Available in disposable or reusable configurations 	

The ProTekt 2.4-mm Slit Knife (Diamatrix Ltd., The Woodlands, Texas) is designed to work with the Monarch III Delivery System (Alcon Laboratories, Inc., Fort Worth, Texas) and other systems that create 2.2- to 2.4-mm incisions. The instrument is designed with sharps safety features that lock the cap in place to prevent surgeons and staff from encountering an open blade before, during, and after use. The ProTekt 2.4-mm Slit Knife is available in disposable or reusable configurations. According to company literature, the knives are packaged six to a box and are available for complimentary evaluation. ■
